Taking Tech on the Road

Most speakers travel extensively as part of their business. Make your travel experience easier and more enjoyable with these high-tech travel tools.

1 CEIVA® Digital Photo Frame

Upload your photos to the CEIVA Web site, and this frame will automatically download and display them. The Wi-Fi model retails for about \$200.
www.ceiva.com

► **Chargepod®** This six-way charging device allows you to charge most mobile electronics with a single power cord. Just pick out the manufacturer-specific adapters for your devices and toss out all of your other power cords. Chargepod uses voltage regulator technology and interchangeable power adapters to safely charge your mobile devices regardless of manufacturer or model. Retails for about \$80.

This information was compiled by Kirstin Carey, CSP, Speaker editorial advisory board

chair and a director of the board for both NSA and the Cigar PEG. Carey works with creative professionals who want to attract more of the right prospects and sell more services. When she's not busy making other people money or volunteering for NSA-related activities, Carey enjoys teaching others how to pronounce her first name. ("It sounds like 'ear': Keer-stin.")
